

Multiplication KS2

<p>KS1</p>	<p>Pupils should memorise and reason with numbers in 2, 5 and 10 times tables. They should see ways to represent odd and even numbers and know how they are represented in tables. This will help them to understand the pattern in numbers.</p> <p>Pupils should begin to understand multiplication as scaling in terms of double and half (e.g. that tower of cubes is double the height of the other tower).</p> <p>Commutative law shown on array. Repeated addition can be shown mentally on a number line. Inverse relationship between multiplication and division. Use an array to explore how numbers can be organised into groups.</p>																			
<p>Year</p> <p>Developing Conceptual/ Procedural Understanding</p>	<p style="text-align: center;">3</p> <p>Building tables</p>  <p>For example, build tables using counting stick-forwards and backwards and with missing jumps</p> <p>Using known facts If $3 \times 2 = 6$, then $30 \times 2 = 60$, $60 \div 3 = 20$ and $30 = 60 \div 2$.</p> <p>Partitioning strategy to double Double 35</p>  <p>Place value materials to represent calculations</p> <p>Partitioning Informal recording of partitioned numbers $15 \times 5 = 75$</p> <p>$10 \times 5 = 50$ $5 \times 5 = 25$</p> <p>$27 \times 3 = 81$</p> <p>$20 \times 3 = 60$ $7 \times 3 = 21$ "20 multiplied by 3 equals 60 and 7 multiplied by 3 equals 21. 60 add 21 equals 81."</p> <p>Grid method $23 \times 8 =$ $20 \times 8 = 160$ $3 \times 8 = 24$ $23 \times 8 = 184$</p> <table border="1" data-bbox="829 657 961 706"> <tr><td>x</td><td>20</td><td>3</td></tr> <tr><td>8</td><td></td><td></td></tr> </table> <p>Short multiplication Expanded</p> $\begin{array}{r} 23 \\ \times 8 \\ \hline 160 \\ 184 \end{array}$ <p>leading to compact</p> $\begin{array}{r} 23 \\ \times 8 \\ \hline 184 \\ 2 \end{array}$ <p>Representing problems A group of aliens live on Planet Xert. Tinions have three legs, Quinions have four legs. The group has 22 legs altogether. How many Tinions and Quinions might there be? Is there more than one solution?</p>		x	20	3	8			<p style="text-align: center;">4</p> <p>Building tables</p>  <p>For example, build tables using counting stick-forwards and backwards and with missing jumps</p> <p>Using known facts If $2 \times 3 = 6$ then $200 \times 3 = 600$ and $600 \div 3 = 200$</p> <p>Distributivity $3 \times (2 + 4) = 3 \times 2 + 3 \times 4$ So the '3' can be 'distributed' across the '2 + 4' into 3 times 2 and 3 times 4</p>  <p>leading to</p> $13 \times 4 = 10 \times 4 + 3 \times 4 = 52$  <table border="1" data-bbox="1081 1112 1228 1161"> <tr><td>40</td><td>12</td></tr> </table> <p>Place value materials to represent calculations</p> <p>Grid method (if needed for conceptual understanding)</p> 346×9 <table border="1" data-bbox="1354 722 1522 771"> <tr><td>x</td><td>300</td><td>40</td><td>6</td></tr> <tr><td>9</td><td></td><td></td><td></td></tr> </table> <p>Short multiplication Expanded</p> $\begin{array}{r} 346 \\ \times 9 \\ \hline 54 \quad (9 \times 6) \\ 360 \quad (9 \times 40) \\ 2700 \quad (9 \times 300) \\ \hline 3114 \end{array}$ <p>leading to compact</p> $\begin{array}{r} 346 \\ \times 9 \\ \hline 3114 \\ 4 \quad 5 \end{array}$ <p>Representing problems</p> <p>Multiply a number by itself and then make one factor one more and the other one less. What do you notice? Does this always happen?</p> <p>Eg $4 \times 4 = 16$ $6 \times 6 = 36$ $5 \times 3 = 15$ $7 \times 5 = 35$ Try out more examples to prove your thinking.</p>  <p>Place $<$, $>$, or $=$ in these number sentences to make them correct: 50×4 <input type="checkbox"/> 4×50 4×50 <input type="checkbox"/> 40×5 200×5 <input type="checkbox"/> 3×300</p>		40	12	x	300	40	6	9
