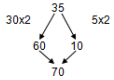
Multiplication KS2

<table>
<tr><td>KS1</td><td colspan="5">Pupils should memorise and reason with numbers in 2, 5 and 10 times tables.
They should see ways to represent odd and even numbers and know how they are represented in tables. This will help them to understand the pattern in numbers.

Pupils should begin to understand multiplication as scaling in terms of double and half (e.g. that tower of cubes is double the height of the other tower).

Commutative law shown on array.
Repeated addition can be shown mentally on a number line.
Inverse relationship between multiplication and division. Use an array to explore how numbers can be organised into groups.</td></tr>
<tr><td>Year</td><td colspan="3">3</td><td colspan="2">4</td><td></td></tr>
<tr><td>Developing Conceptual/ Procedural Understanding</td>
<td>Building tables
 
For example, build tables using counting stick- forwards and backwards and with missing jumps
Using known facts
If 3 x 2 = 6, then 30 x 2 = 60, 60 ÷3 = 20 and 30 = 60 ÷ 2.</td>
<td>Partitioning strategy to double
Double 35
 


Place value materials to represent calculations
Partitioning
Informal recording of partitioned numbers
15 x 5 = 75

10 x 5 = 50
5 x 5 = 25

27 x 3 = 81

20x3 = 60
7x3 = 21
“20 multiplied by 3 equals 60 and 7 multiplied by 3 equals 21. 60 add 21 equals 81.”</td>
<td>Grid method
23 x 8 =
20 x 8 =160
3 x 8 = 24
23 x 8= 184
 
Short multiplication
Expanded

23
x 8
24 (8 x3)
160 (8 x20)
184

leading to compact

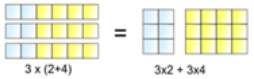
x 8
184
2

Representing problems
A group of aliens live on Planet Xert. Tinions have three legs, Quinions have four legs. The group has 22 legs altogether. How many Tinions and Quinions might there be? Is there more than one solution?</td>
<td>Building tables
 
For example, build tables using counting stick- forwards and backwards and with missing jumps
Using known facts
If 2 x 3 = 6 then 200 x 3 = 600 and 600 ÷3 = 200

Distributivity
3 x (2 +4) = 3 x 2 + 3 x 4
So the ‘3’ can be ‘distributed’ across the ‘2 + 4’ into 3 times 2 and 3 times 4
 


leading to
13 x 4 = 10 x 4 + 3 x 4 = 52
 </td>
<td>Place value materials to represent calculations
Grid method
(if needed for conceptual understanding)

346 x 9
 
Short multiplication
Expanded

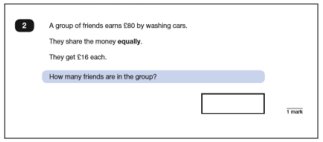
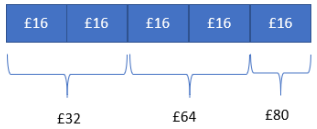
x 9
54 (9 x 6)
360 (9 x 40)
2700 (9 x 300)
3114

leading to compact
346
x 9
3114
4 5</td>
<td>Representing problems

Multiply a number by itself and then make one factor one more and the other one less. What do you notice? Does this always happen?

Eg 4 x 4 = 16 6 x 6= 36
5 x 3 = 15 7 x 5= 35
Try out more examples to prove your thinking.
 
 




Place <, >, or = in these number sentences to make them correct:
50 x 4 ▭ 4 x 50
4 x 50 ▭ 40 x 5
200 x 5 ▭ 3 x 300</td></tr>
<tr><td>Known facts</td><td colspan="3">Recall and use x and ÷ facts for the 3, 4 and 8 x tables</td><td colspan="2">Recall x and ÷ facts for x tables up to 12 x 12.</td><td></td></tr>
<tr><td rowspan="3">Essential knowledge</td><td>Review 2x, 5x and 10x</td><td colspan="2">Double 2 digit numbers</td><td>4x and 8x tables</td><td>10x bigger</td></tr>
<tr><td>4x table</td><td colspan="2">3x table</td><td>3x, 6x and 12x tables</td><td>Double larger numbers and decimals</td></tr>
<tr><td>8 x table</td><td colspan="2">6x table</td><td>3x and 9x tables</td><td>11x and 7x tables</td></tr>
