

Year 2 Homework Project—Spring One

Our Science topic this half term is called 'Animals'. For our homework project, we would like children to find out more about a type of animal that interests them.

This could be a species of animal that you may have as a pet or an animal you would find in the wild. You could:

You could:

- Create a fact file, mind map, poster or booklet about an animal of your choice!
- Go on a minibeast hunt and record what you find
- Watch birds in your garden and keep a record of what you see
- Visit a local farm and write about what you saw there
- If you have a pet, you could keep a diary of everything you do to look after them
- Or another idea of your choice!

Remember: some insects and plants can sting, bite or are poisonous. Please do not pick any plants, eat anything, or put your fingers in your mouth before washing your hands. To protect out wildlife, do not pick the minibeasts up (or use a plastic spoon if you do). ALWAYS return any minibeasts to EXACTLY where you found them.

Project due Monday 10th February.

Thank you for supporting your child with their homework,

Mr Furey & Miss Spencer
